Dyspepsia has been called the American disease. True it is that many of the inhabitants of the United States suffer from indigestion, and of this number the greater part are women, for two or three reasons. In the first place, they take less exercise than men, they eat more indigestible things than men, they are more irregular in regard to the times that they take their meals than men. Many women who are in a position to afford the indulgence of their tastes and whims form the habit of staying abed in the mornings and having their breakfast brought to them. Such a habit is detrimental to the health and to the looks. If one is not well and strong and needs more rest in the day, it is far better to get up in the morning and take the breakfast with the family and have a rest later. The air of the room in which one has spent the night is apt to be close. The body is improved by taking an upright position after having been recumbent the eight or more hours, and the circulation is stimulated. The effect upon the mind of being up and about tends to improve the tone of the system. I have seen women who in times of wealth and prosperity were self-indulgent, lying in bed in the morning and lazily beginning the day, when adversity came, and they were obliged to go forth to some business regularly, improve in health and appearance more than "one would believe." —Health and Good Looks, in The Ladies' World for March.

Enlarging Your Business

If you are in business and you want to make more money you will read every word we have to say. Are you spending your money for advertising in a haphazard fashion as if intended for charity, or do you advertise for direct results?

Did you ever stop to think how your advertising can be made a source of profit to you, and how its value can be measured in dollars and cents. If you have not, you are throwing money away.

Advertising is a modern business necessity, but must be conducted on business principles. If you are not satisfied with your advertising you should set aside a certain amount of money to be spent annually, and then carefully note the effect it has in increasing your volume of business; whether a 10, 20 or 30 per cent increase. If you watch this gain from year to year you will become intensely interested in your advertising, and how you can make it enlarge your business.

If you try this method we believe you will not want to let a single issue of this paper go to press without something from your store.

We will be pleased to have you call on us, and we will take pleasure in explaining our annual contract for so many inches, and how it can be used in whatever amount that seems necessary to you.

If you can sell goods over the counter we can also show you why this paper will best serve your interests when you want to reach the people of this community.
